

Cantilever Library Shelving BSL Series 5

Designed to
complement
the modern
library
environment

Series 5

This sturdily constructed steel cantilever shelving system is manufactured to the highest standards and has been designed to complement the modern library environment. Single sided units can be either wall mounted or free standing for use against walls or double sided as island units. Extension units can be added to create longer runs as required. All shelves are supported by cantilever brackets which slot into the uprights. Shelf adjustment can be simply achieved by repositioning the brackets. All standard shelves are manufactured with a back lip to prevent books from being pushed through.

Accessories

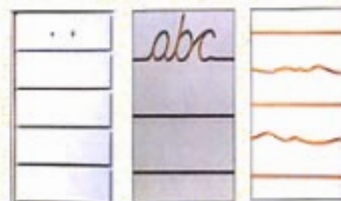

To complement the system there is a full range of accessories which include display shelves, audio/visual & cd/dvd shelves, shelf dividers and swivel/lockable castors.

Custom Designed End Panels & Accessories

Enhance your layout and utilise the ends of the runs of shelving by using our unique Designer Wall panels which use the latest computer controlled machinery to create designs just for you.

They can be supplied in a wide variety of designs and colours from BS/RAL references. Features include aluminium slat inserts, coloured snap in plastic slat inserts, flat or sloping shelf brackets, steel shelf with tray, acrylic riser and display arms.
